

My Portfolio

Ali Raza

Odoo Developer | ERP & Automation Specialist

4+ Years Experience • 91+ Custom Odoo Projects • 12+ Integrations

Introduction

I am an experienced Odoo Developer with over 4 years of hands-on experience building custom ERP solutions. I have developed 86+ custom Odoo modules and delivered 12+ complex integrations, helping businesses automate operations across HR, Sales, Inventory, Manufacturing, Finance, and Document Management.

My work focuses on scalability, compliance, automation, and performance, ensuring long-term operational efficiency.

About Me

Odoo developer focused on scalable ERP systems and business automation.

About Portfolio

A collection of custom Odoo ERP solutions built for efficiency and growth.

About Me

My Vision

To empower businesses with intelligent, scalable Odoo ERP solutions that streamline operations, improve decision-making, and enable sustainable growth through automation and data-driven workflows.

My Mission

To design and deliver high-quality custom Odoo modules that solve real business challenges by improving efficiency, accuracy, and transparency across sales, HR, inventory, finance, and manufacturing processes.

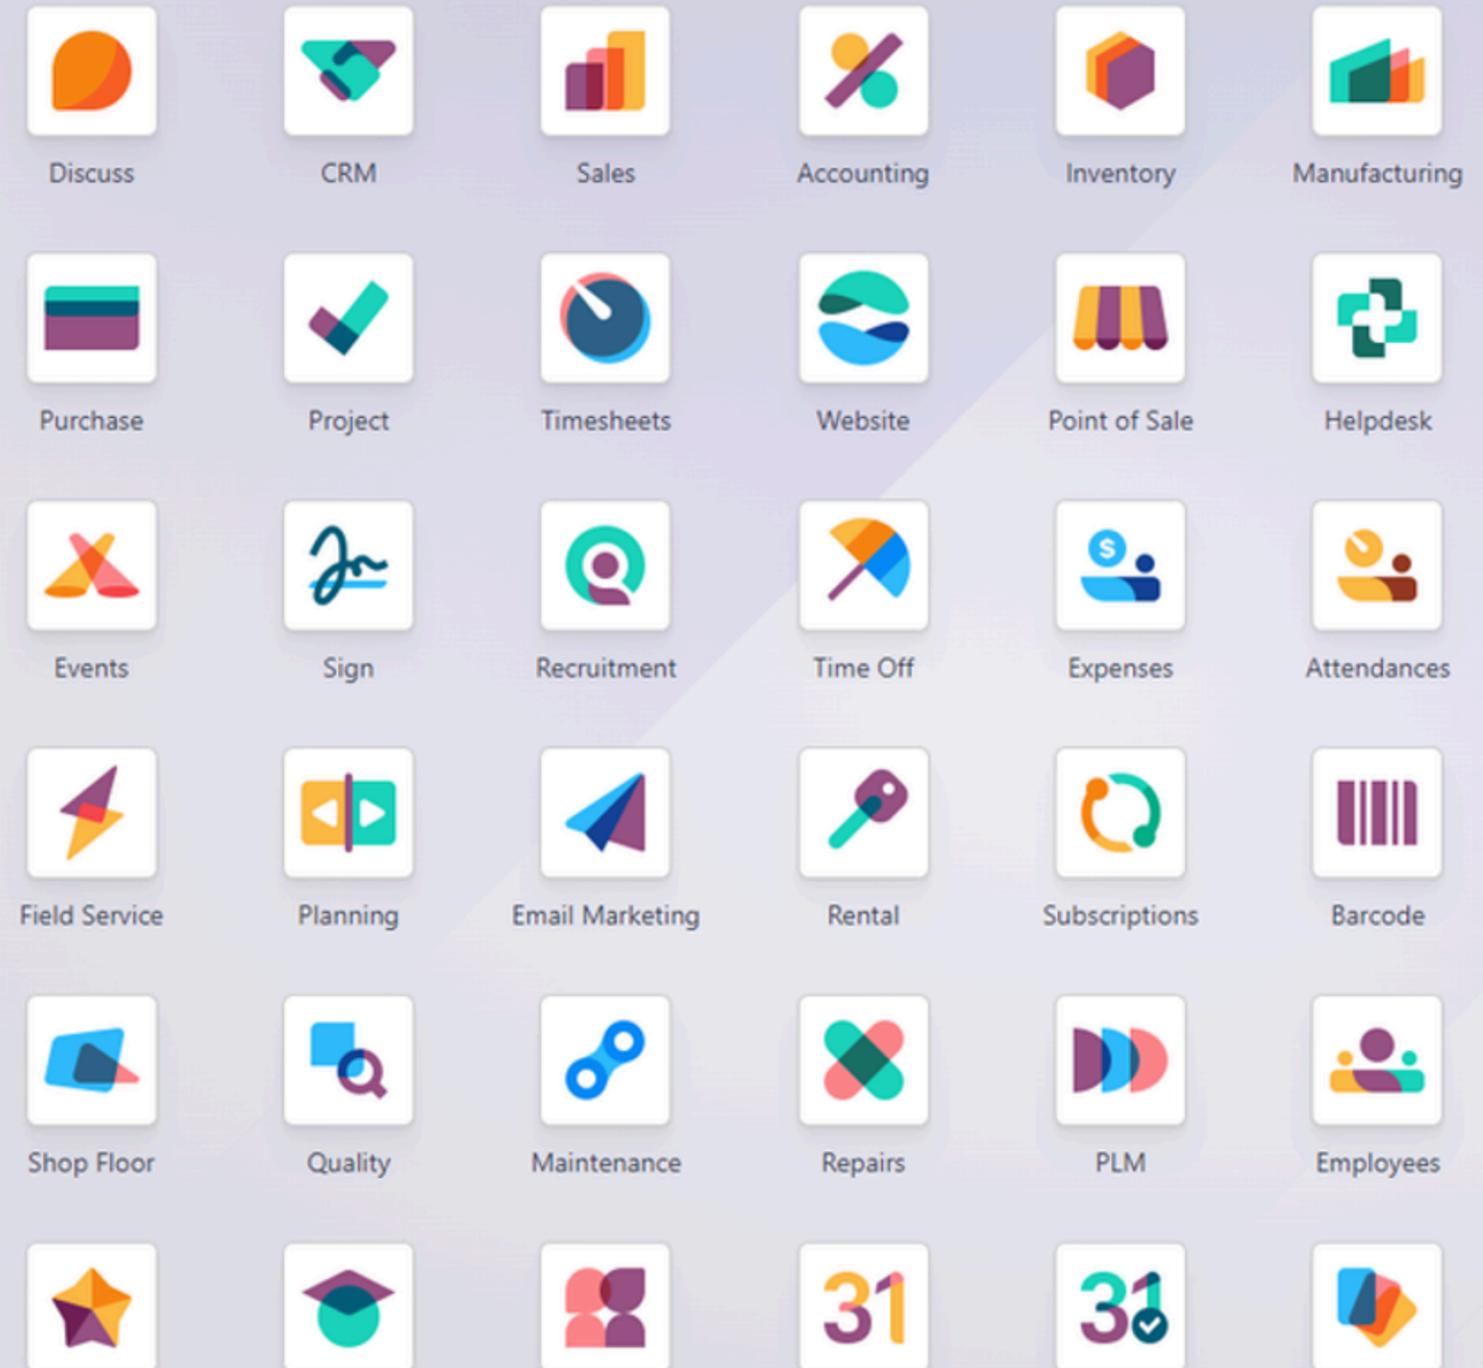

My Vision

- 01.** Design modular, future-ready Odoo systems.
- 02.** Ensure performance, stability, and seamless user workflows.

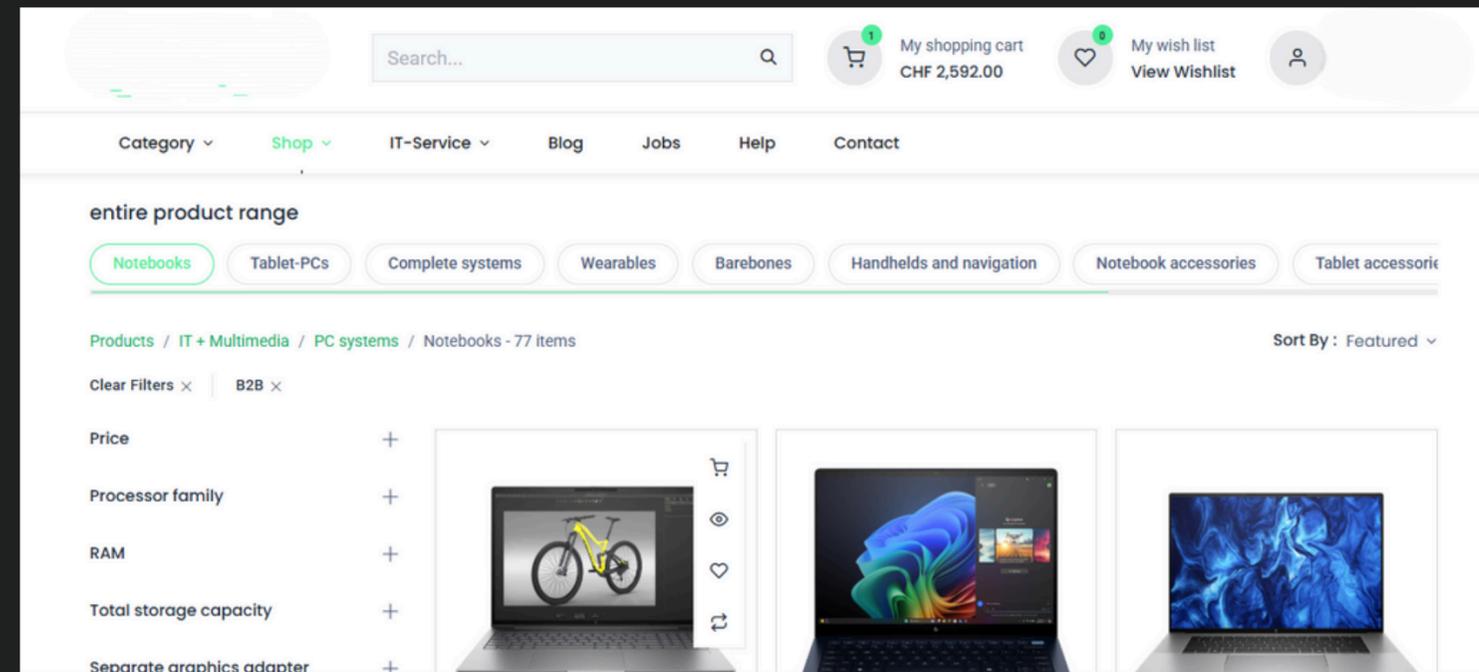

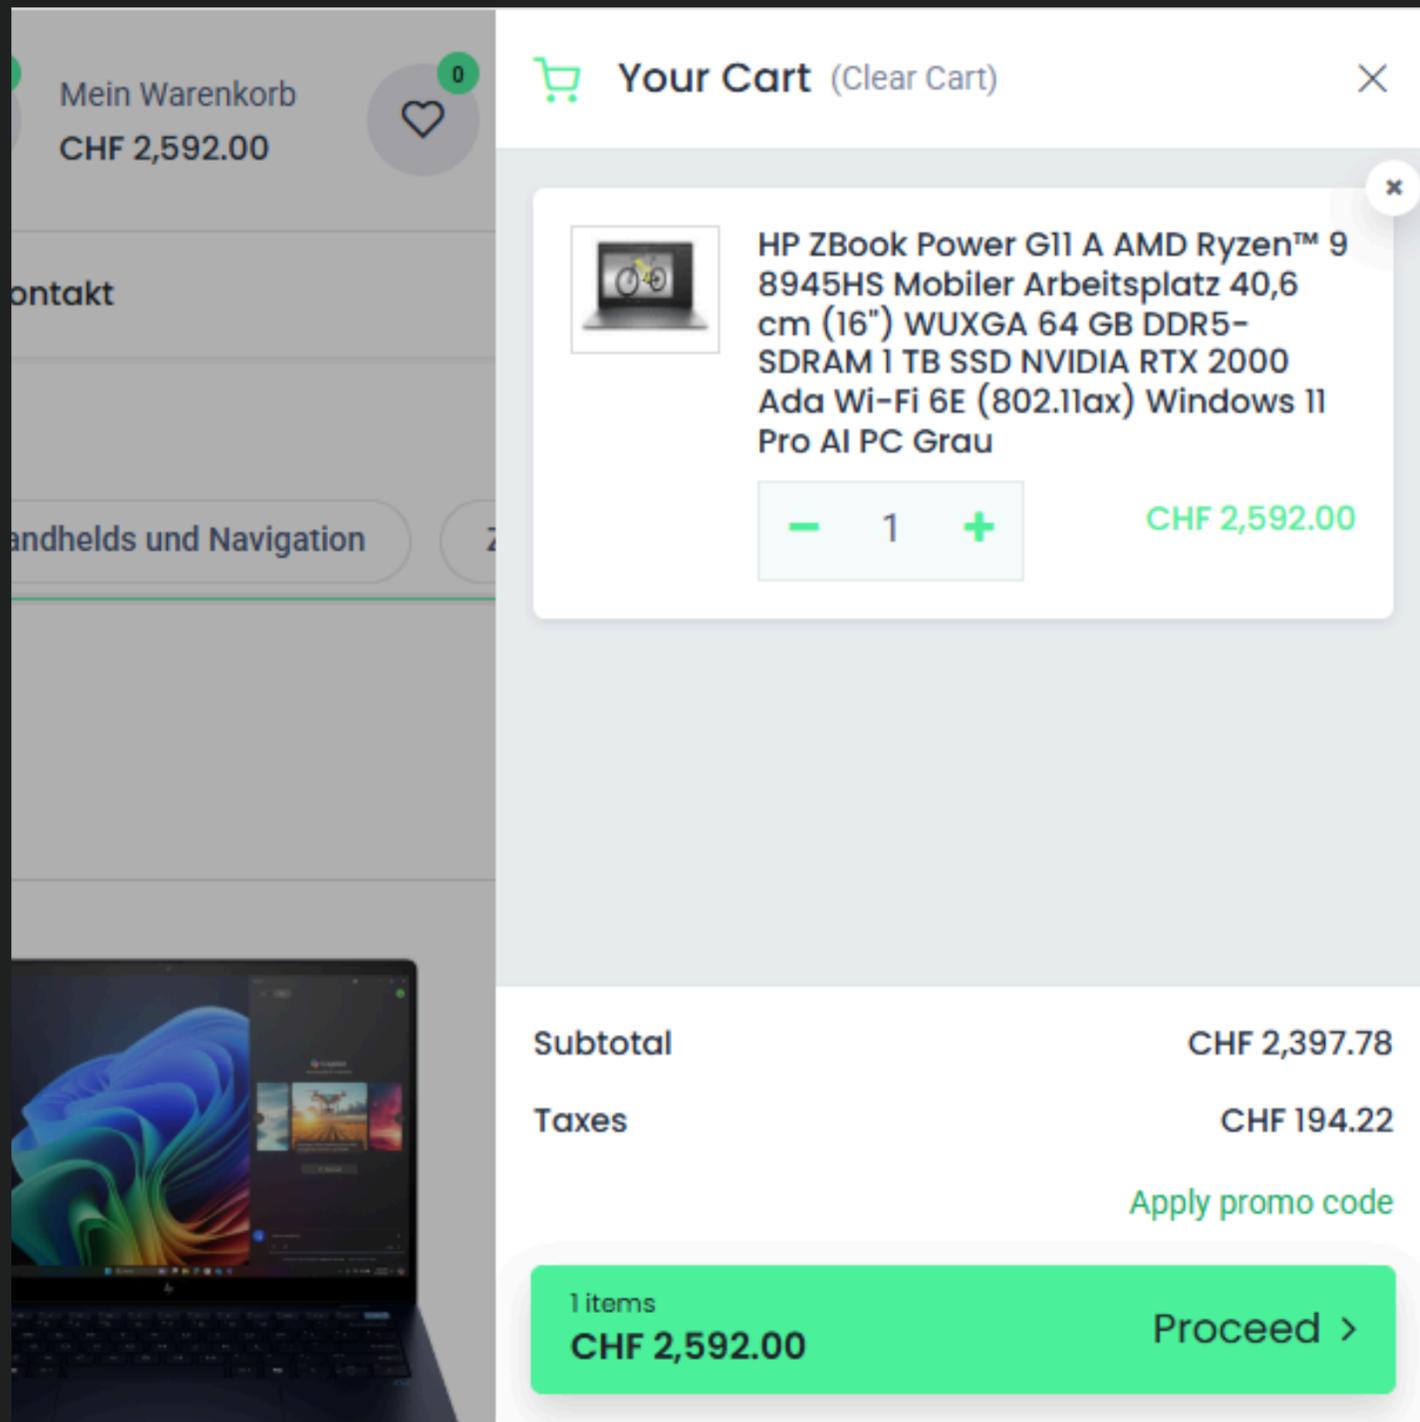

My Mission

- 01.** Develop custom Odoo modules and integrations
- 02.** Automate business processes across departments
- 03.** Optimize system performance and data accuracy
- 04.** Deliver scalable ERP solutions that support long-term business growth

Latest Projects

Custom HR solutions including employee lifecycle management, attendance automation, leave tracking, and KPI frameworks. Advanced eCommerce platforms with integrated product catalog, pricing tiers, and order lifecycle management. Dedicated Mini PC sales program with automated inventory tracking and order processing. System-of-record implementation for inventory, pricing, orders, and customer data with secure eCommerce configuration, role-based access, and post-launch support.

B2B & EDU eCommerce Platform

Developed an eCommerce platform with personalized pricing, exclusive discounts, and real-time inventory management. Integrated secure checkout, order tracking, and support. Streamlined online purchasing and improved user experience.

Entrepreneurship Support Platform

Developed a web platform to empower early-stage entrepreneurs with guidance, coaching, and technical assistance. Integrated tools for business formation, document management, and growth planning. Streamlined access to workshops, support, and resources to help founders start, grow, and scale confidently.

HR & PAYROLL MANAGEMENT SYSTEMS

14 Projects

Custom HR solutions including employee lifecycle management, attendance automation, leave tracking, and KPI frameworks.

Featured Projects

01. Employee Document Expiry Tracking

Customized Odoo to track employee document expirations with automated alerts and reminders, ensuring compliance and reducing manual HR follow-ups.

02. KPI Management System

Developed a KPI tracking system with automated performance scoring and dashboards, enabling data-driven HR evaluations.

03. Geo-Fenced Attendance System

Implemented GPS-based attendance validation to prevent fake check-ins and improve accuracy, providing better workforce monitoring and control.

04. Leave Allocation Customization

Enhanced leave management with automated annual allocations and policy-based approvals, improving transparency and compliance.

05. Payroll Custom Rules Engine

06. Annual Leave Allocation (v15)

07. Employee Training Management

08. Custom Contract Fields Extension

09. HR Policy Portal

10. Workforce Notification System

11. Employee Profile Locking

12. HR Process Custom Fields

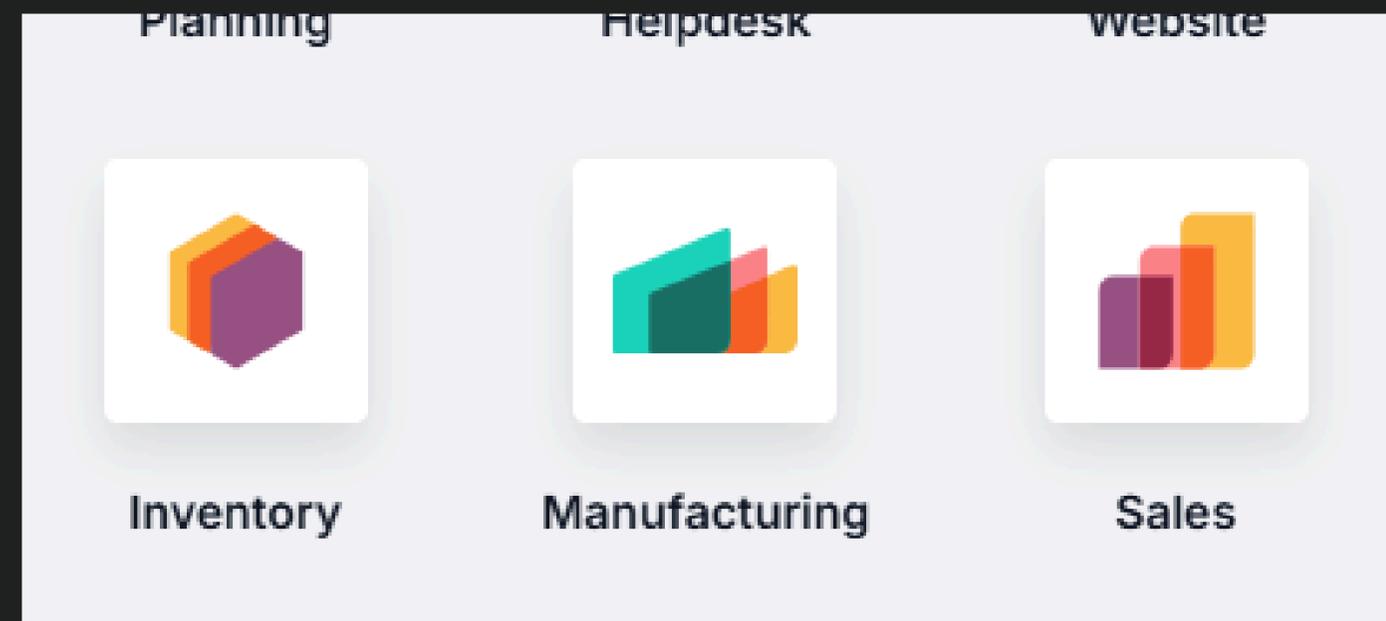

13. Administrative Change Management

14. Multi-Company HR Policies

INVENTORY & WAREHOUSE MANAGEMENT

13 Projects

Advanced inventory control systems built for multi-warehouse operations and stock accuracy.

Featured Projects

01. Negative Stock Management

Added stock validation rules to prevent negative inventory, improving data accuracy and warehouse control.

02. Stock Request System

Created an internal stock request and approval system to track demand and reduce shortages across departments.

03. Multi-Warehouse Stock Control

Configured inventory management across multiple warehouses with automated transfers, enhancing supply chain visibility.

04. Lot & Serial Number Tracking

Implemented batch and serial tracking to improve traceability, audits, and inventory compliance.

05. Mobile Scanning

ACCOUNTING & FINANCE MODULES

12 Projects

Customized accounting workflows aligned with business-specific financial rules and compliance needs.

Featured Projects

01. Payment Preview System

Developed a payment preview feature to review transactions before posting. Reduced posting errors and improved financial accuracy. Enhanced accounting control.

02. Account Custody Management

Implemented custody account management to track assets and assigned balances. Improved transparency and responsibility tracking. Ensured accurate custody reporting.

03. Check Printing System

Developed a check printing module aligned with bank formats. Automated check generation and tracking. Reduced manual processing and errors.

04. Arabic Invoice Formatting

Customized invoice layouts to support Arabic language and RTL alignment. Ensured legal compliance and clear financial presentation. Improved usability for Arabic-speaking users.

05. Extended Chart of Accounts

06. Multi-Currency Enhancements

07. Expense Allocation Engine

08. Tax Calculation Extensions

09. GL Account Locking

10. Budget vs Actual Analytics

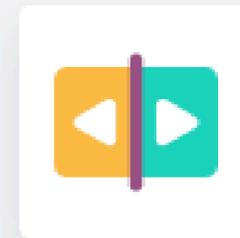

11. Asset Depreciation Tools

Document Management

8 Projects

Centralized document handling solutions with secure access, automation, and compliance control.

Featured Projects

01. Expiry Alert System

Implemented automated expiry alerts for critical documents. Reduced compliance risks and missed renewals. Improved operational reliability.

02. Customer Portal Docs

Enabled customers to securely access documents through the portal. Improved transparency and self-service capabilities. Reduced support dependency.

03. Role-Based Security

Configured advanced role-based access control for documents. Ensured data protection and restricted sensitive information. Improved system security.

04. Version Control System

Implemented document versioning to track updates and changes. Prevented data loss and overwrite issues. Improved collaboration and accountability.

05. OCR Integration

Sales

HR

Featured Projects

01. Job Costing Management

Implemented job-wise cost tracking to monitor materials, labor, and overheads. Enabled real-time cost analysis per project. Improved profitability and budget control.

02. BOM Version Control

Implemented version control for bills of materials to manage revisions. Ensured production accuracy and change traceability. Reduced manufacturing errors.

03. Quality Check Points

Configured quality checkpoints across production stages. Enabled defect tracking and inspection reporting. Improved product consistency and quality assurance.

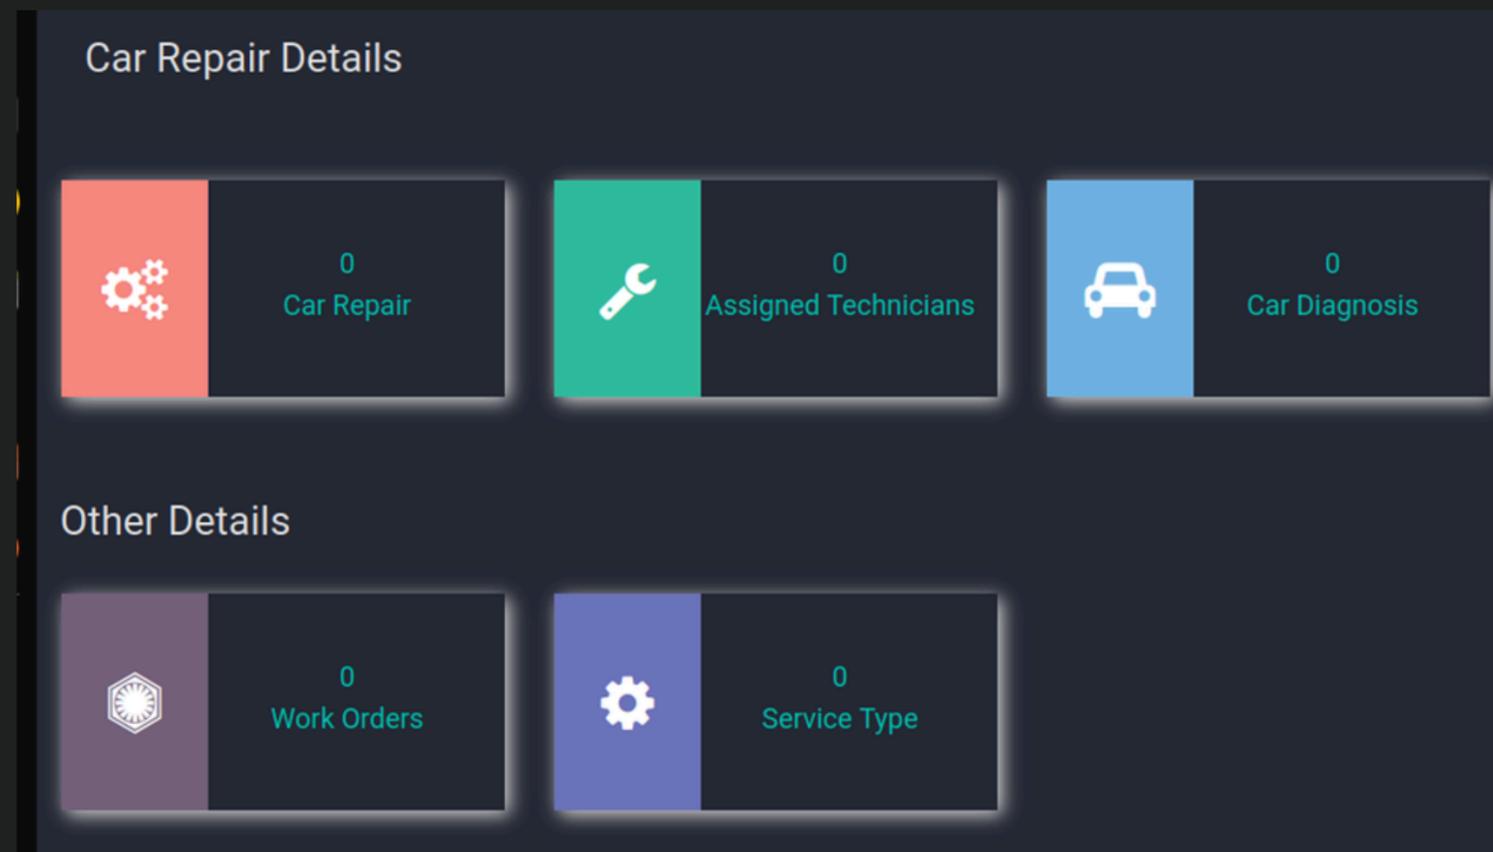

04. Production Routing Analytics

Built routing analytics to monitor production flow and work center performance. Identified bottlenecks and optimized operations. Improved manufacturing efficiency.

05. Workshop Repair System

06. Maintenance Scheduling

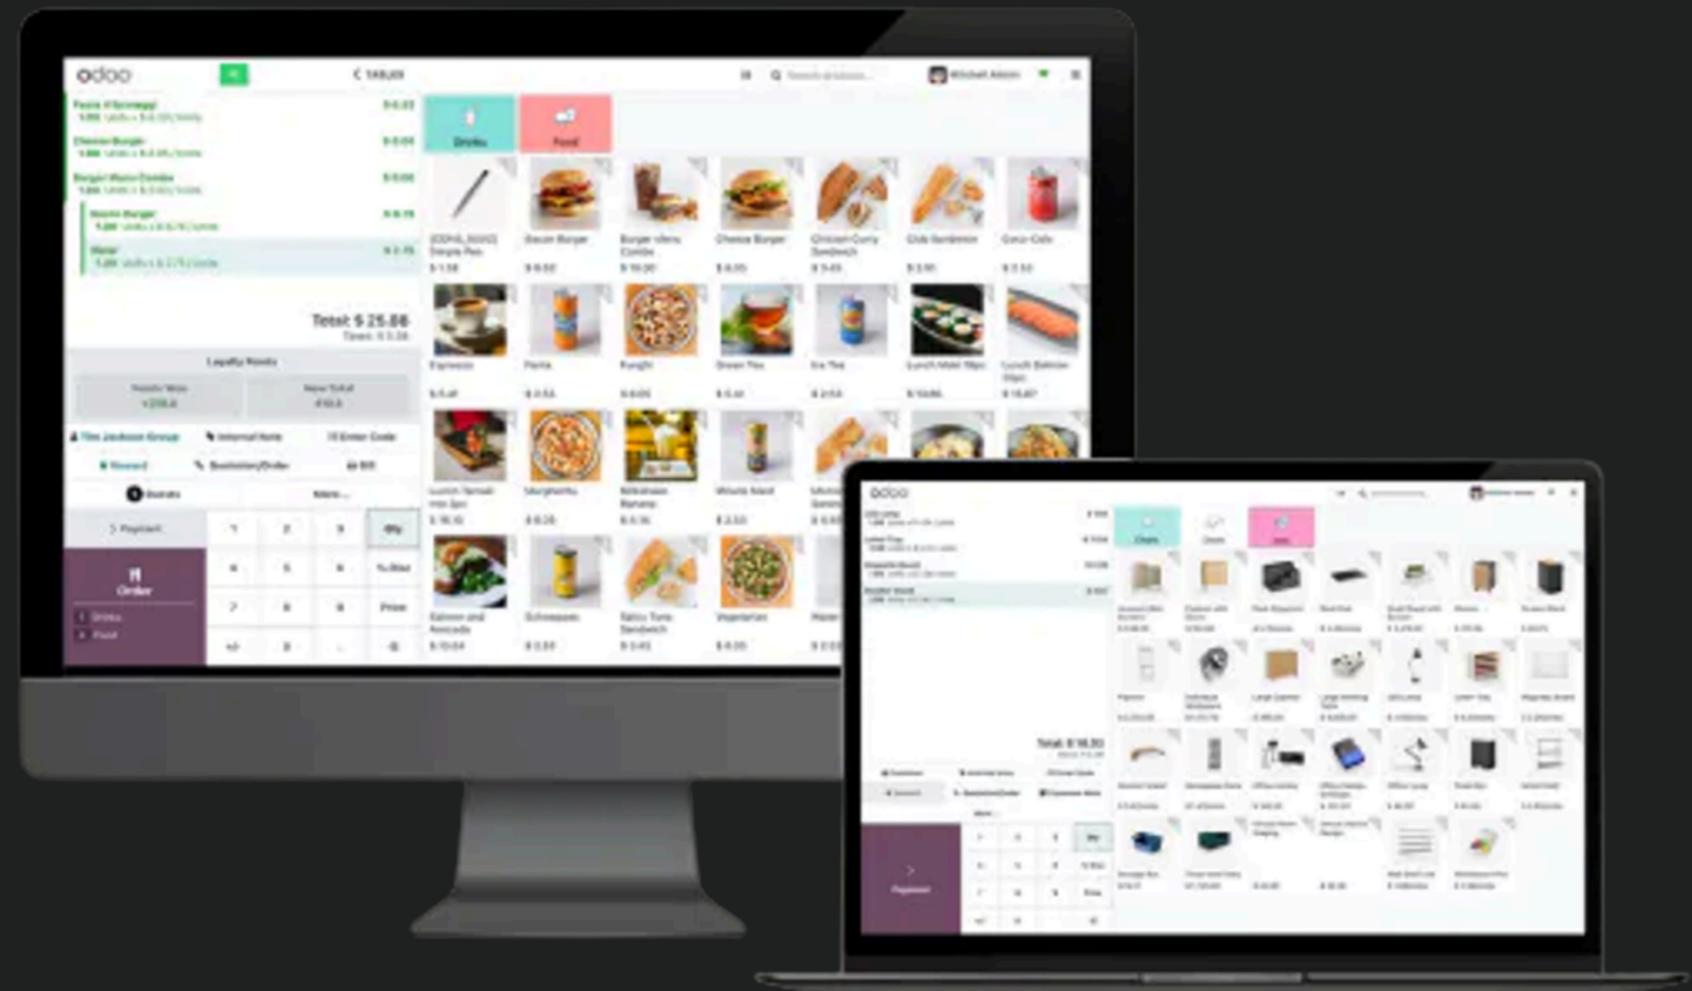

07. Project Document Control

POS & RETAIL SYSTEMS

6 Projects

Retail-focused Odoo POS enhancements for speed, accuracy, and reporting.

Featured Projects

01. Multi-Price List Support

Configured multiple pricing tiers for retail, wholesale, and promotional rates. Enabled customer-specific and region-specific price application. Improved pricing flexibility and sales management.

02. Inventory Sync Engine

Configured real-time inventory updates across stores and channels. Ensured accurate stock tracking and reorder alerts. Improved inventory control and operational efficiency.

03. Offline Sales Mode

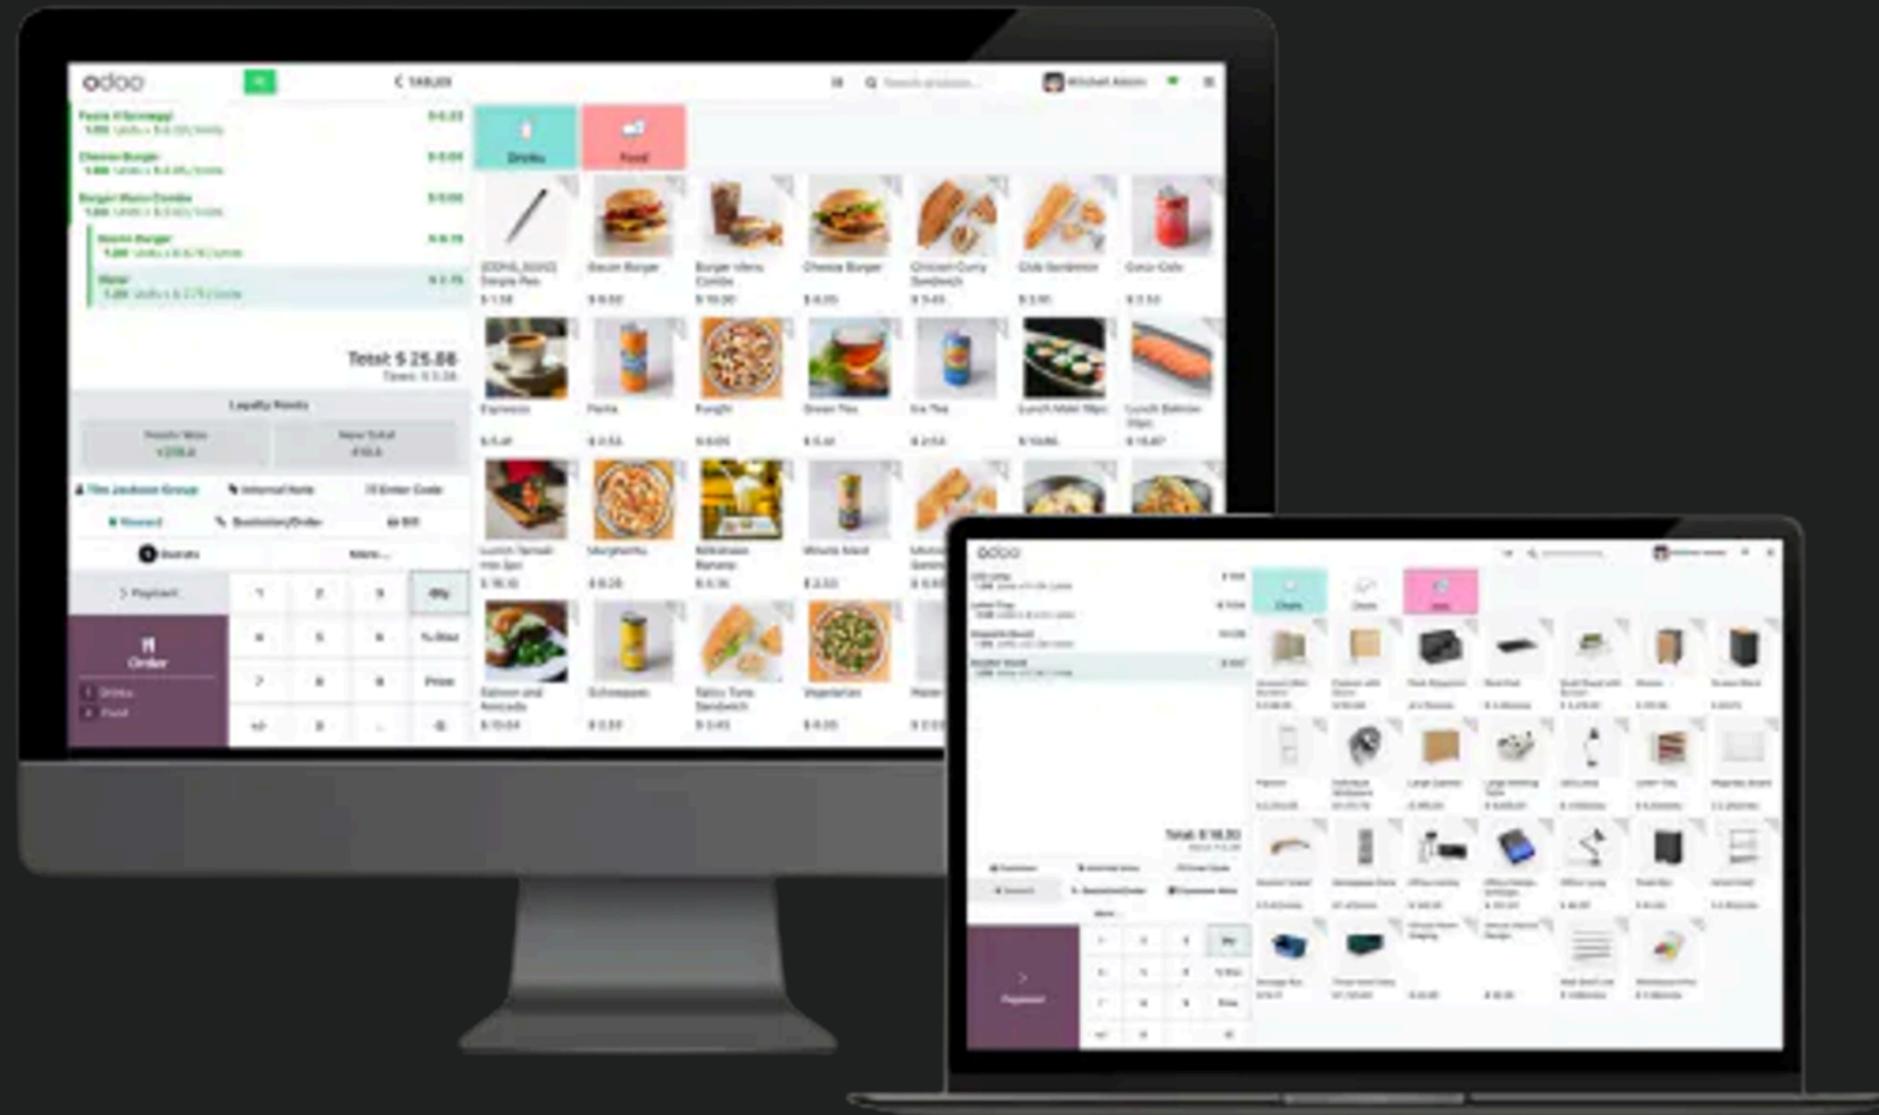

Enabled sales processing without internet connectivity. Ensured local storage and automatic sync when online. Improved business continuity and transaction reliability.

04. Custom Receipt Designer (v15)

Implemented customizable receipt layouts with branding and tax details. Ensured dynamic content and template accuracy. Improved transaction presentation and customer communication.

05. Loyalty Program Integration

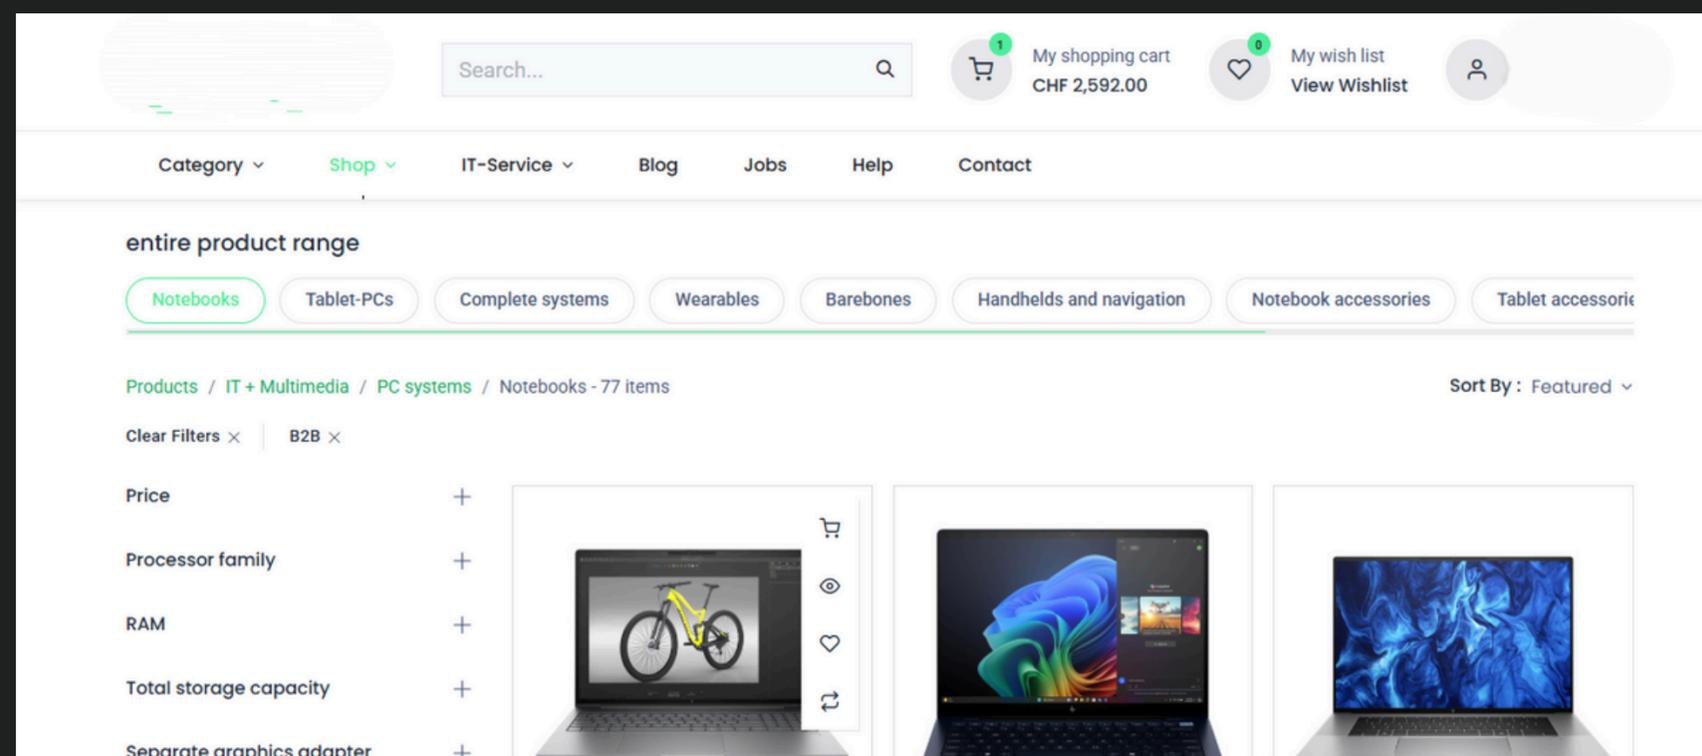

06. Customer Display Module

WEBSITE & ECOMMERCE INTEGRATIONS

6 Projects

Odoo website and eCommerce solutions with custom UI logic and backend automation.

Featured Projects

01. Odoo Website Customization

Developed tailored website layouts and templates to match brand identity. Enhanced product pages and navigation for better customer engagement. Optimized responsiveness and UI consistency across devices

02. Product Page Enhancements

Implemented advanced product display features and dynamic content. Enabled real-time pricing, availability, and variant selection. Improved customer experience and conversion rates.

03. Checkout Process Customization

Customized checkout flow to simplify transactions and reduce cart abandonment. Integrated validation, promotions, and loyalty program features.

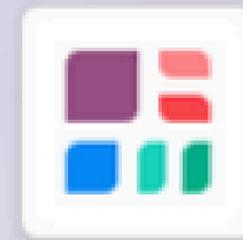

04. Payment Gateway Integration

Integrated multiple payment gateways for seamless transactions. Configured secure and reliable online payment processing. Enhanced financial tracking and reconciliation.

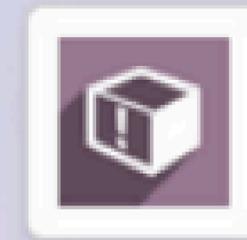

CUSTOM MODULES & SYSTEM AUTOMATION

6 Projects

Bespoke Odoo modules built from scratch to meet unique business requirements and automate the process.

Dashboards

Car Repair

Featured Projects

01. Mini-PC Program

Developed a dedicated module to manage the sale of Mini PCs. Configured product catalog, pricing tiers, and inventory tracking specific to Mini PC models. Enabled streamlined sales, order processing, and reporting for better operational control.

02. Real-Time Dashboards

Configured live dashboards displaying sales, inventory, and operational metrics. Enabled actionable insights and dynamic KPI tracking. Improved monitoring and informed decision-making.

03. Advanced Domain Widget

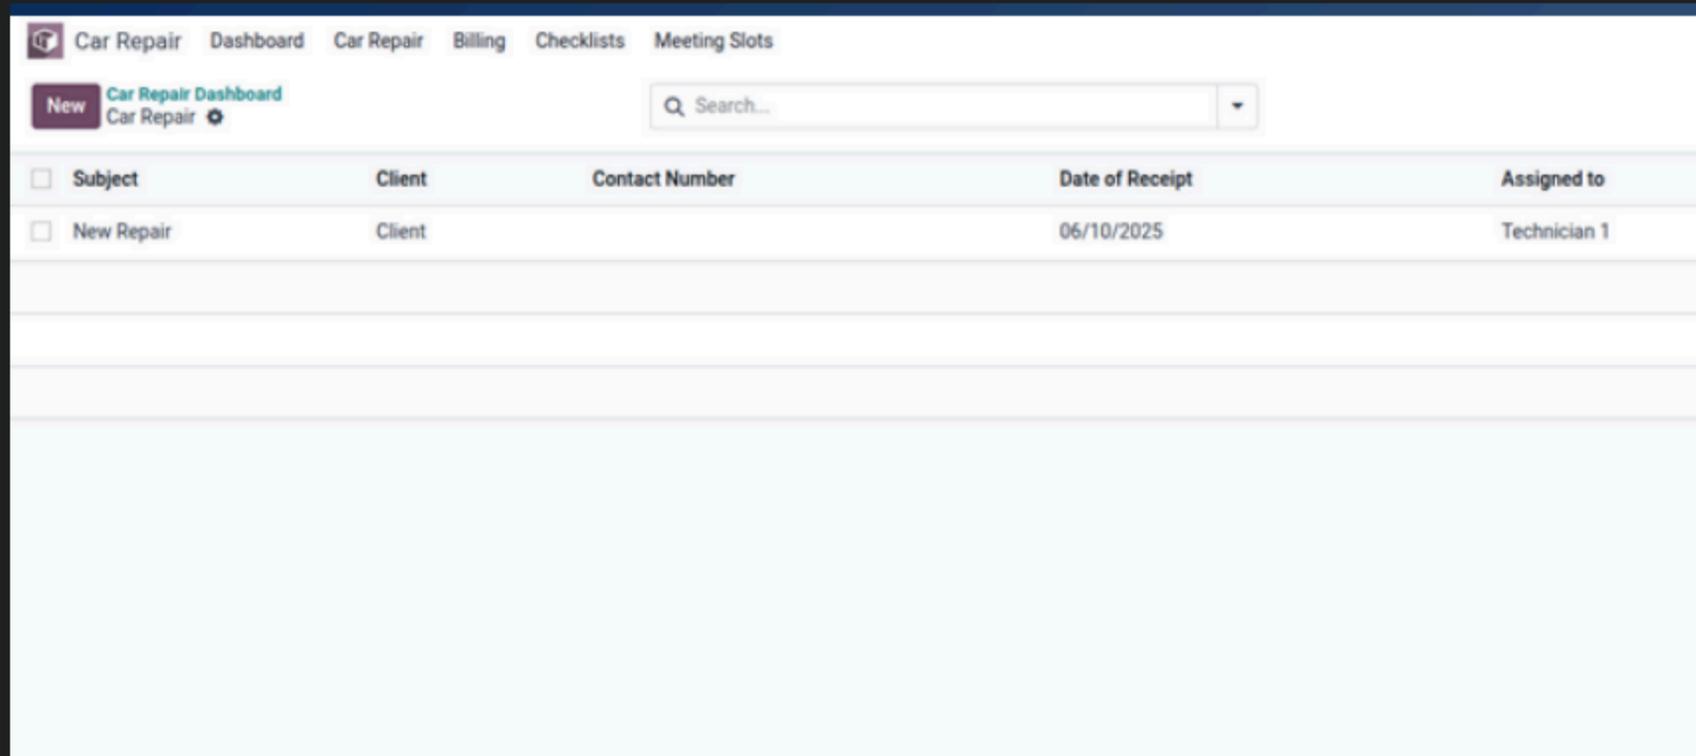

Implemented dynamic widgets for filtering and displaying complex data sets. Enabled user-specific customization and quick data access. Improved decision-making and system usability.

04. Automated Testing Suite

Implemented automated tests across core modules and workflows. Ensured code reliability and regression prevention. Reduced manual testing effort and improved deployment efficiency.

05. REST API Extensions

06. Celery Integration

The screenshot shows a web application interface for car repair management. At the top, there is a navigation bar with links for 'Car Repair', 'Dashboard', 'Car Repair', 'Billing', 'Checklists', and 'Meeting Slots'. Below the navigation bar, there is a 'New' button and a search bar labeled 'Search...'. The main content area displays a table with the following columns: 'Subject', 'Client', 'Contact Number', 'Date of Receipt', and 'Assigned to'. The table contains one row of data: 'New Repair', 'Client', (empty), '06/10/2025', and 'Technician 1'.

<input type="checkbox"/>	Subject	Client	Contact Number	Date of Receipt	Assigned to
<input type="checkbox"/>	New Repair	Client		06/10/2025	Technician 1

Thank You

Thank you for taking the time to review my portfolio. I look forward to collaborating on innovative Odoo projects and helping businesses grow through high-quality solutions.
